Remote Control IR Extender

Ref. 7237

Televés' new Infrared Extender has the following features:

- A flat appearance with a rigid antenna.
- The transmitter and receiver are supplied together with:

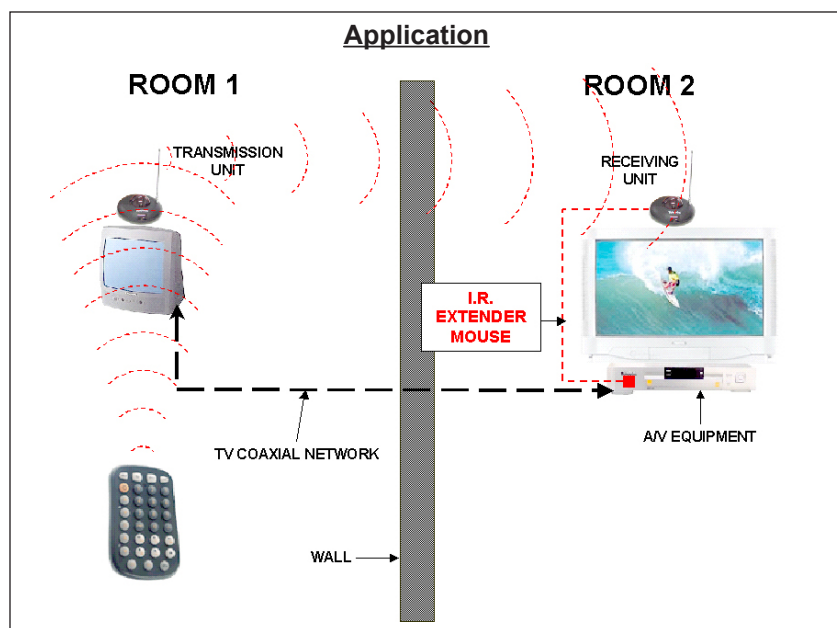

17 V jack.

IF extender mouse.

Declaration of conformity.

The transmitter must be placed in the room (Room 1) from which you want to control your Audio/Video equipment. The equipment in Room 1 must be wired to the A/V equipment that you want to control and that is in Room 2.

The receiver must be in Room 2. You can either place the LED indicator of the Digidom in front of the A/V equipment that you want to control or you can use the IR extender mouse as shown in the picture.
